FOUR TESTS TO SUPPORT SCHOOLS & FAMILIES

The IDAT focuses on helping schools assess how 'ready' a student is for their first day in a new school. It prepares schools to support all students in achieving their potential. The IDAT curriculum was developed by cross-mapping educational standards and curricula from the UK, Canada, Australia and the USA, making it truly global, accessible and unique in its approach. For more details on our full curriculum and learning outcomes, please visit our website.

All our tests are securely administered and can be invigilated either in schools or through our exclusive IDAT Secure 360 in-home proctoring system. This system is available worldwide, providing reliable, rapid and comprehensive results.

STUDENT: K - 12

The International Diagnostic and Admissions Test (IDAT) creates a comprehensive profile of learners' strengths, weaknesses, aptitudes and attitudes. This profile is utilised for the admissions process and to facilitate learning as students begin at a new school.

TEST DURATION: 2 - 3 HOURS

This is a lengthy comprehensive assessment which covers English (both language and literature), mathematics, logic, critical thinking, science and technology.* There is also a character self-assessment that reveals students' attitudes, aptitudes, preferences and levels of comfort both within and outside the classroom.

*Critical thinking, science and technology are for middle and senior high school students only.

TEST FEATURES

The test includes a 10-question interview hosted by an avatar, which schools can view to gain a better understanding of their students. Writing and speaking are qualitatively marked, with comments provided by highly experienced and qualified teachers with ESL specialisation.

STUDENT: SECONDARY LEVEL

The International Diagnostic and Admissions Test is a comprehensive test which creates an in-depth profile of learner strengths, weaknesses, aptitudes and attitudes to be used for the admissions process. It further enables tailored academic support for those about to enter, or planning to enter, the IB program at a secondary or diploma level.

The IDAT for IB and IDAT are congruent for mathematics, character, global knowledge and English language skills in speaking, listening, grammar and vocabulary. However, critical thinking skills are qualitatively assessed in the IDAT for IB through adapted writing and reading components that require students to more actively evaluate sources, literary devices and point of view.

TEST DURATION: 2 - 3 HOURS

This is a lengthy thorough test which covers English (both language and literature at a complex level), mathematics, logic, science and technology. Critical thinking is paramount for international baccalaureate students. There is also a character self-assessment that reveals students' attitudes, aptitudes, preferences and levels of comfort both within and outside the classroom.

The reading assessment requires students to read excerpts of short stories by classic or famous authors. In addition to comprehension questions, the student must be able to identify mood, theme and literary devices.

The written tasks require students to explain and evaluate thematically grouped quotes from famous people throughout history. Students are expected to explain the quotes, critically evaluate their sources and value and interpret their meanings. Additionally, students must define more difficult vocabulary related to themes of knowledge, learning and social justice in their own words. They are also required to construct paragraphs using these words to express their opinions and points of view.

TEST FEATURES

The test includes a 10-question interview hosted by an avatar, which schools can view to gain a better understanding of their students. Writing and speaking are qualitatively marked, with comments provided by highly experienced and qualified teachers with ESL specialisation.

IDAT & IDAT FOR IB – TEST STRUCTURE

TEST STAGE	1 115 MINS	2 130 MINS	3 145 MINS
STUDENTS APPLYING FOR	Aus/US/Can Year 1, 2 or beginning Year 3. UK Year 2, 3, beginning Year 4	Aus/US/Can Year 3, 4 or beginning Year 5. UK Year 4, 5, beginning Year 6	Aus/US/Can Year 5, 6 or beginning Year 7. UK Year 6, 7, beginning Year 8
ENGLISH READING & WRITING	<ul style="list-style-type: none"> Reading comprehension of short stories with pictures for detail. STUDENT: K - 12 AS REQUIRED

The International Diagnostic and Admissions Test for Scholarship Students (IDATSS) is a unique and comprehensive way for schools to assess the academics, character and critical thinking skills of students applying for scholarships.

ADVANTAGES

The advantage of the IDATSS is its universal availability. As the test is continually evolving and updating, schools can gain insights into a student's actual skills, knowledge and abilities. This avoids reliance solely on how well a student has crammed and prepared for other well-known and popular tests. The IDATSS provides a genuine assessment of a student's abilities and capabilities.

The IDATSS can be conducted securely using IDAT Secure 360 in a proctored environment, either in a student's home or through school proctoring on campus. Only the school receives the student's results. Schools wishing to use IDATSS must register with IDAT, enabling them to share testing dates, parameters and information with students and parents.

TEST FORMAT

The IDATSS uses the same format as the regular IDAT or IDAT for IB. It includes critical thinking qualitative analysis by our test assessors, like the IDAT for IB. It can include or exclude interviews, as requested by the school.

Bespoke assessments for scholarship testing for discerning schools. The IDATSS focuses on critical thinking and aligning a school's scholarship criteria with the assessment.

STUDENT: K - 12

The IDAT Concise provides schools with an economical and time efficient way to assess students. This is a computer-marked, shorter version of the IDAT which gives schools a snapshot of information needed to support incoming students.

TEST DURATION: 1-1.5 HOURS

This is a comprehensive concise assessment that covers English (language and literature), mathematics, logic and critical thinking.* There is also a character self-assessment that reveals students' attitudes, aptitudes, preferences and levels of comfort both within and outside the classroom.

*Critical thinking is for stages 3 and up.

TEST FEATURES

This test includes a short 2-question avatar-conducted interview and a short paragraph writing exercise. These samples are given to schools to view and assess students' accuracy, confidence and abilities in productive English.

The International Diagnostic Assessment Test has proven to be a highly efficient tool for admissions, providing rapid results and detailed case monitoring. The ability for parents to conduct admission exams from home has significantly streamlined the process. Based on our experience, Colegio Gran Bretaña highly recommends this platform for its reliability and convenience.

Fiorella Rocha

Director of Marketing and Community Relations
Colegio Gran Bretana, Columbia

GLOBAL COMMITMENT TO QUALITY AND PARTNERSHIP

TINTERN GRAMMAR

At Tintern, we use the IDAT over other testing tools because the richness of the results give us both a broader and deeper assessment of the capabilities of the young people who sit it. From our perspective, the Critical Thinking assessment is particularly useful, but the other measures are also assessed with greater granular detail than other tests we have used. We find the IDAT to be a very useful tool for us.

Brad Fry

Principal
Tintern Grammar, Australia
